

Communicator 3205

HBO

Ordering information

HBO 3205 communicator (digital)	H.20.03440
HBO 3205 communicator (analog)	H.20.03439

There are four different types of selections that can be used to communicate with the occupants of the chamber. The selection is made with the buttons on the control panel unit:

- ALL:
This button will select all speakers, microphones and headsets in the both the Main Chamber and the Entrance Lock.
- MC:
This button will select the speakers and microphones in the Main Chamber. The headsets will not be selected, and will play entertainment.
- EL:
This button will select the speakers and microphones in the Entrance Lock. The headsets will not be selected, and will play entertainment.
- 1-32:
These buttons will select a single patient headset. This allows private conversation between the operator and one specific patients. Speakers and microphones in the chamber will not be selected.

These buttons are divided in 3 groups:

- 1-6: Main Chamber (one side)
- 7-12: Main Chamber (other side)
- 13-14: Entrance Lock

Features

- Inputs for five entertainment audio channels. Each patient can individually select the channel he or she prefers, and listen to it through his/her headset.
- Built- in patient call system. The patients can press a call button, which will send a signal to the operator requesting a private conversation.
- Connector for external headphone and microphone
- Optional: dimmer control for individual patient lights
